

HOW YOUR WATCH IS REPAIRED

There are many stages involved

- Fully dismantle
- De-magnetise case and bracelet and check for damage
- Pre-clean the movement for thorough inspection
- Check for wear, rust, damage
- Genuine parts sourced
- Repair movement
- Readjust balance, train wheels and tolerances
- Second clean in ultrasonic cleaning fluid
- Assemble using an average of four different oils
- Electronic timing, tested in 6 positions for accuracy
- Replace dial and hands
- Re-case movement
- New seals
- Fit glass
- Waterproof test as appropriate
- Clean, refurbish and polish bracelet

RESUME

As a Rolex trained watch repairer, Robert offers the full range of services and repair of these watches, with supply of genuine spare parts direct from Rolex. He sources genuine replacement parts for other brands (e.g. Omega, Longines, Tissot) from reputable suppliers.

Robert has owned his watch servicing business since 1975. His professional qualification was achieved by practical examination in 1977, MBHI Member of the British Horological Institute.

Further professional development has included Omega Watch Company London, ETA Watch Factory in Switzerland, Rolex Watch Company UK & British Horological Institute Education Trust.

Robert is an active member of the South West branch of the BHI. He is involved in education, mentoring and assessment of horological students.

DO YOU KNOW HOW FAR YOUR WATCH TRAVELS?

⇔ In a mechanical watch, the balance wheel turns as fast as the wheels of a car travelling at 60m.p.h. – and a watch runs its race with time nonstop for 24 hours per day, every day, for years on end.

⇔ A balance wheel makes 120 million revolutions every 9 months. The equivalent journey in a car would be 160,000 miles. In ten years that is the equivalent of 2 million miles. *Source unknown*

TAKING CARE OF YOUR WATCH

- ✚ Use a qualified watch repairer who sources genuine parts
- ✚ Take off your watch before showering, bathing, gardening
- ✚ Follow recommended depth levels of water resistance
- ✚ Have your watch serviced at regular intervals: at least 5 years

Give your watch some TLC - it travels further than your car
